

RoomReady View

With View, you get the convenience of being able to effortlessly monitor all your meeting rooms, without ever leaving your office.

As the industry's most comprehensive meeting room analytics tool, View easily diagnoses, prioritizes and addresses problems as they arise, ensuring that incidents are resolved before they become larger issues.

Dashboard

Providing project owners with convenient top-level insights

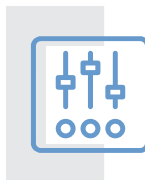

The single source of truth for your meeting spaces, the View dashboard provides project owners with a comprehensive bird's-eye view of all meeting rooms, no matter their location. This means you'll be able to see real-time relevant data on the health of the systems and customer satisfaction scores as well as the ability to drill down into problem areas quickly and even gain visibility into high-level ROI. It's a live look into every meeting, but from the convenience of your own office.

Spaces

Serving system administrators with uptime reports and other comprehensive room data

Whether you have one room or 1,000, Spaces provides administrators with one-click access to all room diagnostics, including room utilization and efficiencies. Through real-time visibility into service issues and requests, users can quickly reduce outages and incident response times while identifying recurring problems and implementing preventative maintenance practices. This means happier meeting attendees and fewer IT interruptions.

Settings

Equipping portal administrators with platform control

And to go one step further, Settings gives portal admins a place to manage the details of the View. Do you want to customize your View platform with corporate branding? Settings can do that. Better yet, do you want to receive an alert when a negative response is received on the customer satisfaction surveys? Settings can do that too.

View at a Glance

View's easy-to-use platform is 100% web based, allowing teams to access their critical room information no matter where life takes them. Designed to help you better manage your meeting spaces and technology, View's Dashboard, Spaces and Settings ensure teams have instant access to everything they need to solve their meeting challenges.

Features

| | Company | Building | Floor | Room | Call |
|---|---------|----------|-------|------|------|
