Video Collaboration

Video collaboration has the potential to achieve more for K-12 schools than simply the hybrid learning techniques that were meant to deal with a pandemic. The rapid adoption of video collaboration can help you deliver better experiences, expand learning opportunities, and increase course offerings for all students- regardless of whether they are in-person, remote, or hybrid.

Benefits of Video Collaboration in Schools:

- ▶ Delivers **equitable experiences** in-person, remote and hybrid with high quality video and audio
- ▶ **Expands curriculum** by allowing distance learning opportunities.
- ▶ Allows focus on teaching instead of technology because the systems are designed to be **easy to use**.
- ▶ Mobile Cart Solutions **maximize facility** options by creating instructional spaces in gymnasiums, libraries, and other spaces.
- ▶ **Cost efficient** by working with the video platforms already used by the school (GoogleMeet, Zoom, Microsoft Teams, Webex, etc.)

Video Surveillance

Schools across the country face a growing set of security concerns that impact the safety and experience of students, educators, and staff. Updating or installing video surveillance systems provide administrators access to live and recorded video footage, allowing staff to monitor and manage local events and incidents. Advanced video software can analyze and recognize people, objects, vehicles and activity, becoming an extension of the security team.

Benefits of Video Surveillance in Schools:

- ▶ Fosters a **safer environment** for students, teachers, and staff.
- ▶ **Lowers the risk** of vandalism and destruction of school property.
- ▶ Aids in investigating incidents and events in and around the school.
- ▶ **Reduces** the need for hiring additional security personnel.
- ▶ Advanced analytical software **empowers** administrators to **proactively address** situations before they escalate.

Access Control

Access control systems are fundamental in supporting a safe school environment as they regulate access at each point of entry and secure the building's perimeter. The system can also limit access to specific areas of the schools including classrooms, storage closets, gymnasiums and more.

Benefits of Access Controls in Schools:

- ▶ Allows administrators to monitor, track and regulate **entry to the building** and specific rooms from a central location.
- ▶ Lock a single door or **lock down** the entire building **instantly**.
- ▶ Replaces keys with access cards, meaning if a card is lost, it's access can be turned off **immediately** without doors needing to be re-keyed.
- ▶ Integrates with Video-Surveillance system for **additional security**.

Intercom

School Intercom Systems are a quick and effective way for administrators to notify, alert and instruct staff and students throughout daily activities and during emergency situations. RoomReady is a certified dealer of CareHawk® Safety Communications Systems, which includes easy-to-use software and the flexibility to work with your existing infrastructure.

Benefits of Intercom in Schools:

- ▶ Delivers messages and alerts **instantly** to individual classrooms or entire school, including hallways and common areas.
- ▶ Combines audio alerts with visual messages for **accessible** communication and improved staff and student safety.
- ▶ District administrators can **initiate** lockdowns, or send weather alerts to a single school or all the schools in the district **simultaneously**.

Sound Systems

Extracurricular activities on school grounds often extend outside of an individual classroom, and into larger facilities like gymnasiums, auditoriums, e-sports rooms, and stadiums. These facilities host sporting events, competitions, productions, and graduations- which each have their own audiovisual needs.

Benefits of our Sound Systems

- ▶ Sound systems are designed specifically for each facility to reduce echo, provide the best coverage and to stay **within budget**.
- ▶ Outdoor sound systems are designed so that the sound **stays within a stadium**, and not in the surrounding neighborhood.
- ▶ Audio limits are pre-set for each sound system, which ensures that the speakers cannot be overloaded and have a longer **lifespan**.

Are you ready to expand learning opportunities and foster a safer learning environment for all your students?

Let's talk about the possibilities.
